Xenith Solutions LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB). We provide comprehensive, timely and relevant Solutions and Business Consulting support to our customers as a key partner. Our leadership brings over a century of combined experience in Defense, Civilian, and Commercial markets.

Our employees possess experience in all aspects of solution development from requirements creation, development, test and evaluation, fielding, and sustainment. At the core of our offerings we provide strategy and technology solutions, giving our customers valuable insights and thought leadership on the best application of information technology to drive business objectives.

We focus on solving complex business challenges facing our customers. We combine the power of technology, our understanding of the mission, and our commitment to serve to deliver the best solutions for our customers toughest challenges. We create, modernize, integrate, and secure mission critical solutions for our Defense, Civilian, and Commercial customers to improve operational readiness, efficiency, and security. Our core offerings include Consulting, Enterprise, Data, and Software & Application Solutions.

“Success Through Achievement”

Our “Success Through Achievement” work ethic means our customers receive quality solutions through our commitment. We pride ourselves on tackling some of the most difficult operational requirements our customers have – ensuring an appropriate match between the mission requirements, financials, schedule, and security. “Success Through Achievement” for our customers is a direct result of our investment in our employees’ professional development, integrity based partnerships, and a focus on innovation.
